

Contiki ECM Query Enterprise

Utilize the full functionality of Contiki ECM Query

Do your colleagues need more information to make good decisions about their contracting processes? With the Enterprise Edition of Contiki ECM Query it is easy to collaborate and share contract process information across the organization, helping managers with their decision making and planning. You can easily analyse your rich contract data by creating and sharing powerful queries and reports with all Contiki ECM users, ensuring that everyone can get an overview of their contracts and follow up changes and commitments on the contracts throughout their full life cycles.

The screenshot shows the Contiki Query Enterprise interface. The top navigation bar includes the logo, user name 'Stettinat, Fredrik Muri', and a help icon. The left sidebar lists various query categories like 'Favorite queries', 'Latest queries', 'Company queries', 'My queries', 'Active contracts', 'All call offs', 'All contracts with optional extensions', 'All unhandled VOIs', and 'Auction section'. The main area displays a query titled 'Active contracts' with a 'Conditions' section where a filter is set to 'Status is equal to Active'. Below this is a table with columns: Number, Description, Start date, Actual end date, Awarded counterpart/partner, Counterpart primary contact name, Counterpart primary contact email, and Count. The table contains two rows of data.

Number	Description	Start date	Actual end date	Awarded counterpart/partner	Counterpart primary contact name	Counterpart primary contact email	Count
5WE-004	Travel	21.04.2006		SEACHILL OFFSHORE AS			
48000003245	PR/Advertising	21.04.2006		SupaPR			

This self-service report management tool for doing ad-hoc reporting and analysis gives you full control as a contract professional. With the Enterprise edition of Contiki ECM Query you can create queries and share them across the company.

Contiki ECM Query provides an intuitive and powerful way to extract relevant information from the repository of well structured data that captures all of the company's contracts, commitments, sourcing events and more.

Data in Contiki ECM Query will be updated on a daily basis, giving you full control of the latest changes. It can assist your company in measure data quality, that again helps you to improve and maintain the quality of registered data in Contiki ECM.

It is easy to share your queries and reports with the right stakeholders, giving them controlled access to the specific information so they only see what they are supposed to see.
