

Contiki ECM Supplier Management

Improve your deliveries and gain control over your suppliers

The relationship with a supplier can be long lasting with increasing complexity. Over the years old contracts expire and new contracts being signed with a supplier. As the complexity increases the need for control and overview arises. In Contiki you can get better control over your suppliers by performing template based scoring for pre-qualifications, bid evaluations, contractor performances, HSE and ethics assessments. You can easily get a full overview over suppliers with all key numbers and all ongoing business and processes, in order to uncover and realize new value and reduce risk.

The supplier screen in Contiki will give you the key numbers with graphics. You will here see the full supplier history as well as all ongoing contracts and planned and ongoing processes. You will also be able to see all structured assessments performed in pre-qualifications, bid evaluations and contractor performance records.

Contiki collects all information enabling you to establish overall supplier KPI measurements. Performing structured Key Performance Indicator (KPI) measurements on a regular basis of your key suppliers is crucial in order to secure your expectations to quality in the deliveries, products and services.

Using not already qualified suppliers requires you to assess the general questions asked to all of your suppliers in all your RFxs. In Contiki you can perform general or template based pre-qualifications on product and service categories at an early stage. Your category managers can work on and ensure good quality of pre-qualification templates. When building your list of potential suppliers for an RFx the system enables you to identify and include the pre-qualified suppliers. You can also import these from other pre-qualification systems like the Achilles systems.

By using template based scoring cards to perform assessments in Contiki you can fast and easily collect and store structured performance information about your suppliers. By delegating parts of the score card to employees with relevant knowledge and experience, you will ensure good quality and speed in the assessment process.

During years of collaboration with your suppliers your organization will gain a lot of knowledge about the operational performance and quality that the supplier provides, but this knowledge is not often available in one place. This makes it difficult to use the experience next time you are inviting a supplier to bid on an RFx. Contiki will collect and store important knowledge and add to the corporate memory around suppliers and your experience with their products and services. This will support you in making the right decisions when inviting suppliers to bid and awarding the next contract.

ABOUT EXARI

Exari delivers the most complete Enterprise Contract Lifecycle Management platform, used every day by market-leading companies to understand all aspects of their contract ecosystem worldwide. With Exari, customers can reduce contract risk and improve operating efficiency with 100% Contract Certainty™.
