# Contiki ECM Consultant Portal

Seamless and secure collaboration with professional partners externally

Developing and managing major contracts involves many stakeholders, often including external consultants and legal advisors. Giving these people occasional or one-off access through your company's internal network is often impossible meaning that processes are much harder to manage. With the Contiki Consultant Portal you can easily give secure access to contracts and documents, ensuring that all collaboration can be done in Contiki with full version control of the documents and the full visibility of the contract lifecycle that your internal stakeholders have come to expect.

One of the key business trends of recent years has been the outsourcing of ever more functions and activities to a whole host of 3rd party individuals and organizations. Whether it is legal work, hands-on administration or other types of task the contracting process has been hugely impacted by these developments.

There are many times when you need to collaborate just as closely with these external stakeholders as you do with your direct colleagues, but this is difficult because you can't directly access the same systems so you have to manage with emails and attachments, trying to find clarifications and correct versions of documents that have been sent backwards and forwards several times.

By giving external partners or consultants secure, fully authenticated access to Contiki ECM via the Consultant Portal, they can access contracts and documents needed for collaboration or review and participate fully in the contracting process.

Sharing of contracts and documents is easily done by the contract professionals in Contiki. The contract professional will always have full control of who has access and will keep track of the document versions and comments.

You can also give employees access to the consultant portal so that they can work from home or when travelling without having to login to the company network through Citrix or similar solutions.
